

# Current sense solutions across the board

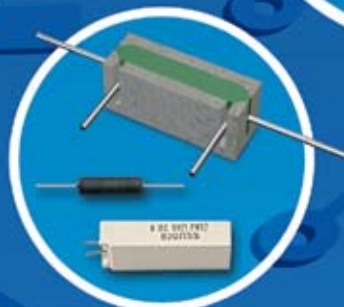

High power resistors

Metal element resistors

Surface mount chips

Wirewound resistors

## The most current sense resistors for more applications

Don't waste time or energy looking for the right current sense resistor. With more SMT and through-hole packages to select from, IRC has the right solution for your next design. Our sales support, customer service and application engineering group will help you find the part you need — fast. Think of IRC first for current sense solutions to your toughest application challenges.

Call IRC today for your current sense solutions:
