## **New Distribution Agreement Expands TT electronics and NAC**

**Carrollton, Texas, February 17, 2011:** TT electronics and NAC announced today an expanded distribution agreement offering a full line of TT electronics components now available through NAC which will provide customers more solutions for their engineering designs.

“NAC has a proven track record of supporting the design needs of specific market segments that closely align with our strategic marketing objectives. We’re excited to have NAC support our sales efforts on an expanded basis,” said Rob Everist, Senior Director of Sales.

“Adding the full range of TT electronics components to our growing portfolio of products in key markets such as Defense, Medical, Alternative Energy and Power will further extend our market reach into these areas. NAC has been a long-standing distribution partner for several of TT electronics divisions and we are looking forward to continued success,” said Joe Sanders, Vice President of Strategic Sales.

### **About NAC**

NAC is a global electronic component design services and Distribution Company with a rapidly growing line card that support the design needs of specific market segments. NAC has built an infrastructure that ensures the highest level of service for customers and suppliers, by offering components in stock and ready for delivery to a complete supply chain program.
