

Next time, we'll design in IRC

Proven performance and application support from the leader in automotive power resistor modules

In the value equation, reliability doesn't have to cost more, but it can save you a lot. IRC's comprehensive series of power resistor modules gives you outstanding performance and proven reliability over the life of your vehicles. From daylight running lamps to speed controls for cooling fans and fuel pumps, IRC has a solution to meet your needs. Our decades of experience and engineering expertise make us the best partner for your power control assemblies. Design with confidence. Design in IRC.
