

# TaNFilm® Chip Carrier Resistor Network

## CCN Series

- Qualified to DESC 87016 and 87017 military specifications
- Gold, Sn/Pb and RoHS compliant terminations available
- Ideal for all reflow soldering techniques
- Meets JEDEC standard for type 'C' package
- Custom schematics readily available
- Absolute TCR to  $\pm 15$  ppm/ $^{\circ}\text{C}$

The IRC TaNFilm® Chip Carrier Network offers higher lead density, increased component count, lower installed resistor cost, better reliability, and is ideal for use with all surface mount solder techniques. In addition, the TaNFilm® leadless CCN provides all the unique qualities of our other TaNFilm® package configurations. Testing has demonstrated performance exceeding MIL-PRF-914 Characteristic H.

Precise state-of-the-art laser trimming provides close tolerances and tight ratios. The TaNFilm® process enables IRC to manufacture custom circuit configurations and multiple resistance values without sacrificing the tightest tolerance and tracking characteristics of precision networks. The Tantalum Nitride resistor material is passivated for environmental protection surpassing military requirements and guaranteeing exceptional ratio stability.

For applications requiring a high degree of reliability, stability, accuracy and low noise, plus the advantages of new resistor configurations, specify the IRC Leadless Chip Carrier Configuration Resistor Network.
